

#### Jevin's Questions:

1. The motor/solenoid is mounted externally. How to connect alligator clips to the PCB?
2. Not sure how to select the right footprint for the barrel jack
3. Enclosure: Electrical box like this: <https://www.homedepot.ca/product/carlon-outdoor-weatherproof-fse-single-gang-pvc-device-box-1-2-in/1000101187>

Jevin's automatic water filter project. Basically two water level sensors inform the microcontroller when to open a solenoid to let water in
